Health Officer—L. M. Powers, M. D. (appointed by the Board of Health); term expires January, 1903; salary, \$2400 per annum.

## **BOARD OF PARK COMMISSIONERS.**

The Mayor, J. C. Cribb, C. B. Dickson, M. J. McGarry, James Russell, H. L. Hopkins, Secretary; J. F. Mendenhall, Superintendent of Parks.

E. E. UNGER  
CITY AUDITOR  
1901-2.

City of Los Angeles, Auditor's Office,

E. E. UNGER, Auditor.

Lewis H. Schwaebe, E. E. Bostwick, Deputies.

Los Angeles, Cal., Dec. 1st, 1901.

To the Honorable Council of the City of Los Angeles:—

Gentlemen: In conformity with the requirements and provisions of the City Charter, I submit my annual report showing the receipts and expenditures of Los Angeles City for the year ending November 30th, 1901, together with a general statement of the financial condition of the city.

Upon assuming the duties of this office we inaugurated the banking system of keeping a daily balance of the different funds this, together with a daily balance of the outstanding demands, enables this office to show the condition of our funds in every particular every business day of the year. This system we consider invaluable and hope it will remain one of the fixtures in the present methods of keeping the accounts of this office. Through the courtesy of City Treasurer Workman we are enabled to check up the balances between these two offices at any time without friction or inconvenience to either office, and at an expense of about ten minutes of time.

The new system of accounts introduced by this office and adopted by your honorable body last April, has been pushed with all the energy the duties of this office would permit, and we hope to be able to install it throughout the entire city government within the next few months. This system is in harmony with the municipal accounting now being developed throughout the country, with the object of establishing uniform distributions of municipal receipts and expenditures, including the prompt return and proper check of all revenues collected and of all accounts to be collected. Further improvements in the accounting system of the city and additional economy in its administration would result from the city obtaining a new charter.

The support given by your honorable body and the cordial reception received from the different departments regarding the working out of the details of the new system of accounts is greatly appreciated.

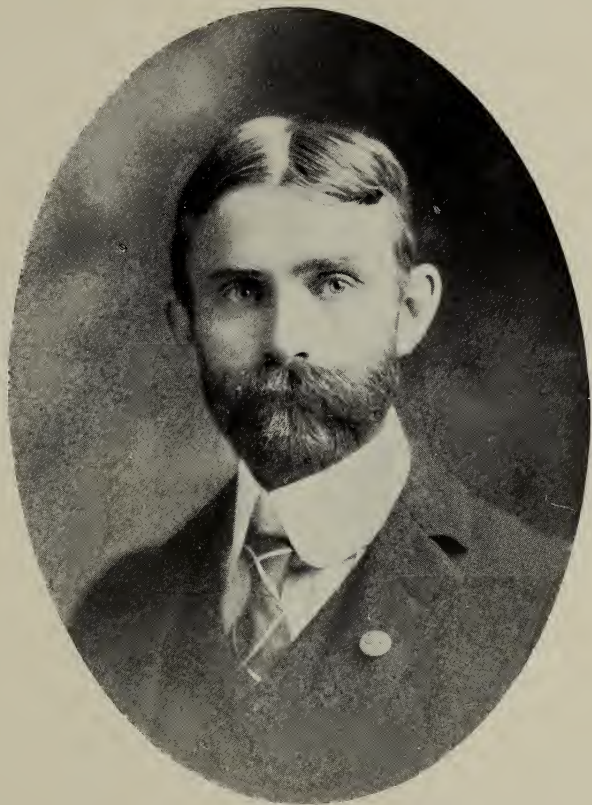

The further duty of familiarizing ourselves with the present methods in use in conducting the business of the Los Angeles City Water Company, according to your instructions of September 24th last, has been diligently pursued, and we hope to be of material service to your honorable body when the water works finally come into possession of the city.

Respectfully submitted.

A stylized, cursive handwritten signature of E. E. Unger.

City Auditor.

W. B. MATHEWS  
CITY ATTORNEY  
1901-2.

The amount of bonded indebtedness which the City can assume as regulated by Act of Legislature is 15 per cent. of assessed value. The charter of the City of Los Angeles (Article XXII, Sec. 223) provides that its indebtedness must not exceed in the aggregate two million dollars, except for the purpose of providing water works for the City and establishing and constructing a sewer system. Interest and principal of all bonds is payable at the office of the City Treasurer, in Los Angeles. No default has ever been made in the payment of an obligation.

## GENERAL INFORMATION.

### LOS ANGELES CITY.

There are few, if any, cities in the United States of a hundred thousand population, or thereabouts, that are so well known as Los Angeles, the commercial metropolis of Southern California.

Many outsiders, and not a few newcomers, are inclined to inquire the secret of the marvelous growth of this city, from a population of 11,000 in 1880 to 102,457 according to the census of 1900. There are three leading features that have contributed to such growth; these are, climate, soil and location. Any one of these advantages would be sufficient to build up a large city, but taken together they insure the future of Los Angeles as the metropolis of the southwestern portion of the United States.

The pueblo of Los Angeles was founded under the protection of the Spanish governor in 1781. In 1854 the population was only 4,000, of whom only 500 were Americans. The census of 1880 gave Los Angeles a population of 11,311. In 1890 the population was 50,000.

The streets of Los Angeles are well improved. There are over 200 miles of graded and graveled streets, eighteen miles of paved streets, over 300 miles of cement and asphalt sidewalk, and 160 miles of sewer. The sewer system is complete with an outlet to the ocean. The city is brilliantly lighted by electricity.

The merchants of Los Angeles do a large business with the section of country extending from Arizona on the south to Fresno on the north. The principal articles of export are fruits, fresh and dried, potatoes and vegetables, beans, wine and brandy, wool, honey, canned goods, wheat, corn and barley. The Los Angeles banks carry deposits aggregating over \$23,000,000. There are three transcontinental lines of railway, with another building by the way of Salt Lake City.

The commencement of work, by the Federal government, on a break-water, which will make of San Pedro a deep-water harbor, accommodating vessels of large draught, is of the utmost importance to the commercial interests of Los Angeles, and it is believed to mark the commencement of a new and flourishing era.

The street railroad system of Los Angeles is very complete, the total mileage of single track being about 150 miles, of which nearly all is electric. In addition to the local lines, there is a line of electric railway from Los Angeles to Pasadena, and another from the city to Santa Monica.

Los Angeles has for several years been the scene of remarkable activity in building operations, building permits having been issued at the rate of over \$3,000,000 a year.

There is a great variety of location for residence within the city limits of Los Angeles, which cover over thirty-six square miles. In the west and northwest are hills of considerable altitude, from which magnificent views may be obtained of the surrounding valleys, with the ocean in the distance, and the Sierra Madre range of mountains on the north. There are seven attractive parks, aggregating 600 acres in area, of which five-sixths is in Elysian Park. In two of the parks concerts are given on Sundays.

The public schools of Los Angeles rank very high. There are also a number of private schools and colleges. The public library is noted for its completeness and excellence among similar institutions in the United States. There are many musical, artistic and scientific associations, and several first-class theaters.

The population of Los Angeles is cosmopolitan, including representatives of almost every section of the globe. In addition to the papers appearing in English, newspapers are published in the German, French, Spanish, Italian and Basque languages.

The total deposits on Nov. 1, 1900, in the banks of Los Angeles amounted to \$23,306,507; bank clearances in 1900 were \$122,692,555; in 1899, \$86,341,616.68.

### U. S. Census—Population.

	1880.	1900.
Southern California .....	64,371	304,000
Los Angeles City.....	11,300	102,457

Area of Southern California (which includes the seven Southern counties), 44,901 square miles, or 29 per cent of the area of the State. (Annual Report, Chamber of Commerce.)

Present City Charter, Adopted February, 1889.

Art. I, Section 11, provides that the "tax levied for any one year, for all municipal purposes, other than payment of interest on the municipal debt and redemption of bonds, shall not exceed \$1.00 on each \$100.00 worth of taxable property."

Property is assessed at about fifty per cent of its actual valuation.

Art. XX, Section 207. "The City of Los Angeles shall not be, and is not bound by any contract or in any way liable thereon, unless the same is made in writing by order of the Council, the draft thereof approved by the Council, and the same ordered to be, and be signed by the Mayor, or some other person authorized thereto in behalf of the City; provided, that the approval of contracts by the City Attorney, as required by the provisions of Article IV of this Charter shall be indorsed on the draft thereof before the Council shall have power to approve the same; but the Council by an ordinance may authorize any officer, committee or agent of the City to bind the City without a contract in writing for the payment of any sum of money not exceeding three hundred dollars."

The amount of bonded indebtedness which the City can assume as regulated by Act of Legislature is 15 per cent of assessed value. The City Charter (Art. XXII, Sec. 223), provides that its indebtedness must not exceed in the aggregate two million dollars, except for the purpose of providing water works for the City and establishing and constructing a sewer system.

Harry F. Stafford, City Engineer, reports the following important pieces of construction work completed during the year ending November 30, 1901:

The Third-street tunnel, 1575 feet; entire cost, \$102,042.05.

The Broadway tunnel, 1005 feet; entire cost, 78,875.95. This is the widest tunnel in the United States, except a short subway in Philadelphia, which is 41 feet.

The East Main street storm drain, 1153 feet; total cost, \$1,331.96.

The Arroyo de los Reyes storm drain, 855 feet; cost, \$1,538.90.

The West Lake District storm drain; cost, \$6,324.92.

Arroyo de los Pecos storm drain, 817 feet; cost, \$10,389.33.

Partial surveys have already been made in reference to a new outfall sewer, to be constructed entirely of masonry; estimated cost, \$650,000. Interior system, \$325,000. This new proposed outfall is estimated to care for a population of 500,000.

Plans and estimates are now being made by the City Engineer for Fourth street bridge of steel; estimated cost, \$50,000. Aliso-street bridge; estimated cost, \$27,000, and combination bridge on Macy street, \$10,000, and Arroyo Seco, \$8,000.
